

## NBS EduWORLD - Project Education Learning Unit Overview

Prepared by: Prof. Gemma Donnelly-Cox, Dr Conor Dowling, Dr Maria Gallo - Trinity Business School

### Learning Unit (LU) Planning Template - High Level Overview

Name of Learning Unit (LU) Topic		Implementing Nature-Based Solutions					
NBS Context (e.g. urban rural, coastal)	NBS keywords <b>complete checklist at the end of the document</b>	Other Keywords (topics other than NBS) <b>add in Other below</b>	Linked or complementary concepts to NBS (to assist curriculum integration)	Prior learner knowledge of NBS (high, moderate, low/none)	Prior instructor knowledge/ skills/ competences of NBS or equivalent	Key EU NBS resources used (for instructor preparation) include link	Type of LU - lecture, workshop, field trip/site visit
any				moderate	moderate		Lecture
Target academic subject / discipline / professional area or group	Target learners/ groups [age range of learners] if applicable	Min/ Max # of learners (if applicable)	Sector (e.g, professional, higher education, community)	Prerequisites required of learners if applicable (education)	EQF (European Qualifications Framework) level (or Irish NFQ) indicative only	Time for LU (aim is 50 minutes per learning unit)	Course delivery format (e.g. in-person, hybrid, online)
General	Undergraduate	n/a	professional or higher education		EQF 6 - Irish NFQ 7/8 Ordinary/H	50 minutes	Hybrid
Overall Purpose	The purpose of this unit is to explore the practical aspects of implementing Nature-Based Solutions (NBS) in cities. The session covers the key stakeholders, business models, financing, and community engagement involved in NBS projects. Students will understand how EU						
LU Summary (2-3 sentences)	This unit focuses on how Nature-Based Solutions (NBS) can be successfully implemented in cities to tackle challenges such as flooding, urban heat islands, and biodiversity loss. The session also highlights community engagement, collaboration strategies, and financial models that facilitate NBS, with examples from EU-funded projects like Connecting Nature.						
Learning Outcome 1	Understand the process of implementing NBS, including the key stakeholders, business models, and financing strategies.						
Learning Outcome 2	Identify the role of community engagement and collaboration in ensuring the success of NBS projects.						
Learning Outcome 3	Evaluate the challenges and opportunities in scaling up NBS, with an emphasis on policy frameworks and EU funding mechanisms.						
Learning Outcome 4							

## Activities and Elements of Learning

*Aim that each learning unit include at least 4 activities for an interactive learning experience*

Time (duration of activity)	Aims - linked to NBS concepts or topics)	Link to Learning Outcome	Learning Activity [PPT Slide # - if applicable]	Teacher action/activity (Learner action/activity)	Confirmation of learner's learning (assessment of learning)	Link to online NBS resources (and/or academic resources with DOI as relevant)	Offline resources and materials (e.g. post-its,)
15 minutes	Introduce NBS and the key stakeholders involved in NBS projects.	1	Overview of NBS in urban green spaces	Define NBS and explain the stakeholders (e.g., government, private sector, community groups) involved in their implementation. Provide examples of how NBS projects are co-designed and supported by various actors.	In class discussion are designed to engage students; Learners respond to the questions and the teacher will determine understanding from their responses	<a href="https://connectingnature.eu/">https://connectingnature.eu/</a>	Post-it notes for a <b>brainstorming exercise</b> on <b>NBS concepts</b> and how they might apply to local urban challenges.

15 minutes	Discuss EU policies, funding mechanisms, and co-funding models to support NBS projects.	2	PowerPoint (or verbal sharing of content)	Present EU funding mechanisms such as Horizon Europe, LIFE Program, and Interreg. Discuss how co-funding models can support the implementation of NBS and ensure sustainability in the long term. Highlight real-world EU projects like Connecting Nature and their approach to funding and governance.	In class discussion are designed to engage students; Learners respond to the questions and the teacher will determine understanding from their responses		Post-it notes for a brainstorming exercise on NBS concepts and how they might apply to local urban challenges.
------------	---	---	---	---	--	--	--

15 minutes	Explore community engagement and stewardship in the implementation of NBS projects.	3	PowerPoint and discussion	Discuss the importance of community participation in NBS projects to ensure long-term success. Provide examples where local communities played a key role in the design and maintenance of urban green spaces and green corridors. Explore how community-led stewardship contributes to sustainability and ownership of green projects.	In class discussion are designed to engage students; Learners respond to the questions and the teacher will determine understanding from their responses		Post-it notes for a brainstorming exercise on NBS concepts and how they might apply to local urban challenges.
5 minutes	Wrap up the session and ensure that all key learning points have been understood.	1, 2, 3	Open Discussion	Open the floor for questions on implementing NBS, financing models, and community engagement. Provide feedback and encourage students to reflect on practical applications of NBS in real-world urban settings.	Teacher will ask follow-up questions based on students' responses to ensure key learning outcomes have been achieved. Give instant feedback on students' ability to connect NBS concepts with real-world applications.		NA

Curriculum integration (how it may connect to curriculum)					
<u>Teaching &amp; Learning Trends employed</u>  <u>Highlight all that apply</u>  (Source)	<b>Project-based learning:</b> e.g., students work in groups on a research project on greenhouses and the greenhouse effect, alternatives to waste management or investigate what are the views of their peers on climate change.	<b>Peer learning:</b> e.g., students work in groups, evaluate the work of their peers, or develop assessment questions to assess peers.	<b>Problem-based Learning:</b> e.g., students are introduced to a problem and challenged to find a solution together based on the information provided to them.	<b>Student-centred learning:</b> the learning scenarios are not based on classical instruction by the teacher, but they are expected to actively engage students in the lessons.	
21st Century Skills  <u>Highlight all that apply</u>  (Source)*	<b>Creativity:</b> e.g., students think of various solutions for promoting a better lifestyle in their communities or encourage greener solutions to their schools' issues.	<b>Information/Media literacy:</b> students explore examples of NBS, research similar solutions in other communities.	<b>Collaboration:</b> e.g., students work in groups and engage in task division to produce outputs.	<b>Critical thinking:</b> e.g., students learn that a debate on deforestation or climate change does not consist of two opposing camps only but involves many stakeholders with different perspectives.	<b>Communication:</b> e.g., students present their work to the whole class and learn to put forth strong arguments based on facts.

**NBS Keywords Checklist (tick here below)**

	<i>Forest Preservation</i>
	<i>Forest Restoration</i>
	<i>Forest enhanced management for woodfuel harvest</i>
	<i>Forest Production</i>
	<i>Grassland Preservation</i>
	<i>Grassland Restoration</i>
	<i>Grassland grazing management</i>
	<i>Coastal Preservation</i>
	<i>Coastal Restoration</i>
	<i>Coastal maintenance of slope vegetation</i>
	<i>Maintenance of coastal, floodplain and riverine vegetation</i>
	<i>Agroforestry</i>
	<i>Reduce tillage and carbon restoration practices</i>
	<i>Agricultural intensification</i>
	<i>Urban forests and green spaces</i>
	<i>Urban green roofs</i>
x	Climate-change adaptation and mitigation
x	Sustainable cities/ sustainable communities
x	Re-naturing cities/ re-naturing communities
x	Urban regeneration
x	Coastal resilience

Teacher Resources (If 'Notes' are used in the related PowerPoint presentation please indicate here)	Learner Resources (e.g. academic articles or links) for advanced reading or review (citation in individual cells)
	NBS
	Faivre et al (2017) NBS and the

	Multi-functional watershed management
	Enhancing the insurance value of ecosystems
	Sustainability of the use of matter and energy
x	Sustainable development
x	Innovating with nature
x	Biodiversity
x	Nature-based enterprises
x	Nature-based entrepreneurship
x	NBS and new business and investment models
x	Citizen participation, stakeholder/community consultation
x	Disaster risk reduction
	Risk management and resilience
x	NBS policy development and implementation
	NBS research
	Green infrastructure
	Green finance / sustainable finance
x	Ecosystem services and ecosystem-based approaches
x	Rural municipal/local authority/government planning
x	Coastal municipal/local authority/government planning
x	Urban municipal/local authority/government planning
	Improving well-being and quality of life
x	NBS and new business and investment models
	NBS and CCAM (Connected, Cooperative and Automated Mobility)
	Other 1: (Please specify) nature-inspired innovations
	Other 2: (Please specify)
	Other 3: (Please specify)
